Available Scribblers Resources

[Trivium at the Table Placemats Classical Conversations MultiMedia](#)

Brightly colored, laminated placemats that correspond to the history and geography memory work used in Foundations.

[Trivium Tables Whiteboard Classical Conversations MultiMedia](#)

Trivium Tables: Whiteboard is a lightweight, portable, and durable product to provide parents with a “stick in the sand” that may be taken anywhere to demonstrate new concepts and ideas. For students, the *Whiteboard* provides a blank slate for practice of any kind, including drawing and mapmaking, writing letters and numbers, practicing arithmetic, and more.

PreScripts Classical Conversations MultiMedia

The PreScripts series combines art, history, and cursive. Because young children learn visually and kinesthetically through tracing, coloring, and drawing, the first level of PreScripts teaches the cursive alphabet as your child colors images from the timeline.

Nature Sketch Journal Classical Conversations MultiMedia

Inspire your students to develop their observation skills through drawing and recording observations in this beautiful sketch journal. With inspirational quotes, Scriptures, and poem excerpts sprinkled throughout, this book alternates pages for drawing and writing. A reference section in the back includes interesting science facts, a classification of living things chart, a timeline of famous scientists, the periodic table, and measurements and conversions tables. A ruler on the back cover makes it easy to make measurements in the classroom or on a nature hike.

Saxon K-3 Manipulatives Saxon Publishers

Teach abstract math concepts through items that your child can touch and manipulate. Includes 450 pieces (a student clock, color tiles, dominoes, and much more) in a convenient storage container. The Saxon Teacher's Manuals explain how to use these items.

Quick Flip Arithmetic Classical Conversations MultiMedia

Quick Flip Arithmetic was developed to give students a fun and engaging way to review the major forms of arithmetic while gaining speed and accuracy. Using a regular deck of cards, students create a personalized set of mental drills as they play with different numbers. Students can progress at their own pace from the four basic operations (addition, subtraction, multiplication, and division) to more complicated games involving fractions, mixed numbers, and exponents.

Song School Latin Classical Academic Press

Peppered with songs, illustrations, handwriting practice, stories, games, and engaging activities, Song School Latin provides a fun and interactive introduction to Latin.

Spell to Write and Read: Core Kit Wanda Sanseri, BHI Books

The Core Kit provides the first four to six years of unified language arts. Spelling serves as the foundation for phonics, penmanship, literature, composition, grammar, and vocabulary. The program uses a logical progression, multi-sensory instruction, and scientific research to produce outstanding spellers and readers.

[American Language Series Readers Dr. Guyla Nelson, Mile-Hi Publishing](#)

American Language Series is a series of six beginning readers filled with hundreds of short stories containing interesting character training themes, science, history, nature, and more. Written with one-syllable words, each book is designed around one of the six basic phonics word groups in our American Language. Includes practice with simple short vowels, consonant clusters, Silent E, controlled vowels, vowel digraphs, and diphthongs.

[Discovering Great Artists MaryAnn F. Kohl, Kim Solga](#)

Discovering Great Artists provides 110 Hands-on Art projects in which children experience the styles and techniques of the great masters, from Renaissance to the present. A brief biography of each artist is included with a fully illustrated, child-tested art activity, featuring painting, drawing, sculpture, photography, architecture, and more!

[The Story of the World Susan Wise Bauer](#)

We encourage parents to read aloud to their children as often as possible! The four-volume Story of the World series by Susan Wise Bauer may be used to flesh out the memorized events of our timeline and place them in a more complete context. Told in a delightful narrative format, these four books include engaging stories from the beginning of civilization to the collapse of the Berlin Wall. Also available are audiobooks and corresponding activity books that provide parents a complete history curriculum for children in grades 1-4.

[Drawing with Children Mona Brookes, J.P. Tarcher](#)

As we teach children about beauty, we suggest Mona Brookes' Drawing with Children, which includes an easy-to-follow, step-by-step approach to drawing. This invaluable teaching aid not only guides readers through the basics, but also gives important advice on creating a nurturing environment in which self-expression and creativity can flourish.
